“REVOLUTIONIZING THE WAY
KIDS LEARN TO RIDE A BIKE”

There's only one KAZAM!

The KaZAM Story

Back when their kids were small, the KaZAM founders experienced firsthand a new phenomenon they had never seen before — the balance bike! Kids in Europe were learning to ride bikes using balance bikes — small bikes without pedals that allowed the child to develop their balance before attempting to ride a bicycle with pedals. “Genius!” the founders said, and tried it with their younger son, who was then 2 ½ years old. Their son (who was still in diapers, by the way) took to this concept immediately, and in no time his parents were coasting towards what would become new lives for them- those of entrepreneurs!

Today, KaZAM has become an industry leader in the ever-growing world of balance bikes. Yes, we realize there are other balance bikes on the market but, with our unique award-winning design and commitment to quality, we think you’ll find KaZAM to be the right choice!

Skip the training wheels with KaZAM

No Pedals-No Problem!

What IS KaZAM?

Say goodbye to training wheels and skinned knees! Designed (and patented!) with an easy step-in frame design with footrest, the KaZAM bike allows little riders to develop their balance before introducing pedaling — making the transition onto a pedaled bike seamless. After all, it's the balance that's the hard part ~ pedaling is easy! **Recommended for ages up to 5 years.**

Our Commitment:

To provide consumers with a high-quality product that meets industry safety standards at the best value.
